Jun 2017 - Mar 2018  
St. Johns Public School, Chennai

# PROJECTS

## BLOG WEB APPLICATION

- A powerful blog app made using NextJS, Tailwindcss, NodeJS, Express, and MongoDB. Wait less and read more, All the blogs are rendered in the server itself. More user-friendly and responsive BlogApp.
- [https://github.com/SarathAdhi/Blog\\_YT](https://github.com/SarathAdhi/Blog_YT)

## SARA CLI

- Powerful CLI for developers who are looking for a common CLI that installs both React and Tailwind CSS or Next and TailwindCSS and automatically configure the tailwind.config.js. Supports both Javascript and Typescript templates for React and Next.
- <https://www.npmjs.com/package/@sarathadhi/cli>

## HOLD YOUR BOOK

- In this website, The concept is to Recommend books to the user. The user can download books for free and can add his/her favorite books. The books are separated according to their genre, language and difficulties. Books are recommended to users based on their activity.
- <https://holdyourbook.herokuapp.com/>

## HELPERDOC

- I started this website as a platform for sharing notes among our university and help my university friends to get notes for all the subjects just 1 week before our Final-Examination. I completed this whole website in 1 day without focusing on the UI/UX and focused only on the uploading and downloading part. Then after many active users, I developed the frontend and made the website responsive.
